If you're like me, I'm sure you're debating between this and some firewire/thunderbolt option.. One last thing I would have appreciated in other reviews is a little bit of info on Time Machine.. The Seagate Backup Plus is the first drive in the new line of Seagate Backup external hard drives that replaces the popular Seagate GoFlex family.. While the GoFlex name is gone, the new drives gtk on the cocoa framework for macI usually get 25-30MB/sec with this, and in my case, that's plenty of speed..
